

Powering Solutions for the Future in Corporate

Angela Comitini, Visual Retail I Segment Marketing Manager
Internet of Things Group

Why this matters now?

Workspaces are being redefined

Requirements for each type of room environment are different, but the collaboration experience needs to be the same

It also needs to be the same for remote workers...

- **43%** of professionals globally work remotely at least once a week... by 2020, **50%** of all workers will be remote
- Employees without access to flexible work options are **2x more likely to be dissatisfied** at work
- **Millennials** in particular are more likely to quit a job with substandard technology

Sources: Dell & Intel Future Workforce Study Global Report, 2016; Gallup's State of the American Workforce 2016, Werk: A Flexible Future is here

Costs are HIGH!

- 68% of workers experience that **95% of meetings start late**...delayed by an average of 10 minutes, 40 seconds.
- 9 in 10 office workers experience technology-related **stress in meetings**
- Lost productivity due to ineffective meetings costs the U.S. economy **\$75B-\$283B**

Transforming the Future of Work

- Businesses and organizational **complexity**
- **Pace of technology** is at all time high
- More companies are agile & are using technology as a **competitive advantage**
- **Innovation** with the age of AI and automation

Disruption is happening...

Evolution of conference technology

Overhead Projector

Slow, manual, limited to transparencies

Whiteboard

Manual, color, easier maintenance

Digital Projectors

Large screen digital & video projection, PC connection, low image quality, high maintenance

Interactive Flat Panel Displays (IFPD)

Integrated PC, Multi-touch, high quality resolution, no replaceable parts (low TCO), shadow free

Intel enables
partners
to deliver flexible,
powerful,
end-to-end
Interactive Flat
Panel Display
solutions

Intel's IWB Solutions: More Engaging, Effective, and Powerful

Seamless Sharing Experience

Drives inclusion and improves engagement through collaborative technology

Easy maintenance & Security

Reduced maintenance and support costs with Intel® vPro™ technology.

Powerful All-in-One Solutions

Intel's compute solutions integrate seamlessly into back panel, simplifying connectivity and collaboration

Compute for the Future of Work

Modular computing options that enables analytics and machine learning solutions.

Intel's Solutions Driven by **Powerful** Compute Options

External Form Factors

Standard PC, Purpose-built PC, NUC

Open Pluggable Specification

OPS & OPS+

Intel® SDM

Smart Display Module
